

= Developer/Network Utility

= Decentralized Application

WELCOME TO WEB 3.0

It's a whole new world out there. Nobody should ever have the right to control your life, the money you make, the things you say or the people you want to communicate with or WORK WITH. The 3rd version of the web is far more effective being ran by robots that operate with no emotion, yet give you the life, liberty & happiness you deserve.

dBrowser

dBrowser is made for browsing the dweb:// and http:// intranets and the main connector.

dMesh

POW-based blockchain where users combine their hardware to create a new mesh network.

dWeb

A truly distributed & decentralized internet protocol (dweb://) that has no blockchain.

Arisen

A fork of the EOS blockchain, used as a financial dApp network, for fintech for use over dweb://.

dPay

A new economy where dPay's chain pays users of dApps that are built on the dPay network.

Telechain

The blockchain used to decentralize telecom and internet naming systems for the dweb://.

ARK Identity (Banking Only)

dPayID (Global Identity)

dDrives

The safest hard drive in the world has no boundaries.

github.com/dDrives

Smart Contracts

Coders can build the financial apps for future generations.

github.com/ArisenIO

dSocial

Experience social media that pays you without censorship.

github.com/dSocialNetwork

dDNS

A domain system that nobody can seize or control.

github.com/Telecoins

dDatabases

DBs distributed p2p by dApps & dSites w/o a blockchain.

github.com/dDatabase

aBank

The original & world's first decentralized bank.

github.com/ArisenIO

dVideo

Get paid for your videos without censorship.

github.com/dVideos

dVOIP

Where your phone calls are only yours to listen to.

github.com/Telecoins

dHosting

Distributed web hosting for the dweb://. It's free.

github.com/dHosting

aExchange

Decentralized crypto exchange on the Arisen network.

github.com/ArisenIO

dSite

Decentralized blogging dApp that pays you for blog posts.

github.com/dSocialNetwork

dVPN

Browse the dWeb privately and anonymously.

github.com/Telecoins

dPress

Free decentralized & distributed CMS/website builder.

github.com/dDatabase

aSwipe

Debit Card dApp/ Smart Contract on the Arisen network.

github.com/ArisenIO

dPix

Decentralized social network of images that pays you for pictures.

github.com/dPixIO

dSSL

Decentralized SSL certificates for truly trusted security.

github.com/Telecoins

dMemo

P2P dWeb chat dApp using dDatabases.

github.com/distributedweb

dVote

Decentralized voting dApp for dGovernance issues on Arisen.

github.com/ArisenIO

dWiki

The decentralized & open encyclopedia that pays curators.

github.com/dWikiIO

dNames

Decentralized domain registrar for the dWeb.

github.com/Telecoins

dPack

The decentralized version of the GIT protocol for dweb://.

github.com/dDatabase

dGovernance

A decentralized governance, elected to run Arisen's network.

github.com/ArisenIO

dSeek

Decentralized search engine for dWeb, dPay, Arisen & Telechain.

Coming Soon

dStatus

E2E decentralized social network powered by dDatabases.

github.com/distributedweb

dTunes

Decentralized music streaming dApp that pays artists.

Coming Soon

& THESE NETWORKS LIVE ON FOREVER.

That means developers around the world will only expand Web 3.0, built on the key principles of freedom, because if we don't, we'll remain slaves. If it's the last thing I could give to the world, we should never let it go without continued innovation.

Our future depends on it. **Never lay down for anyone. #MAGA**

J. R. Dice
